## Change Over Switches

ABN offers wide range of Change Over Switches for manual operation. The range of Change Over Switches confirms to latest IEC 60947-3, 60947-6-1 standards. The products are in line with best design and quality standards

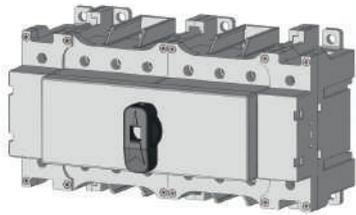

#### Features and benefits

- CB certifications for IEC 60947-3 from UL lab to conform IEC 60947-3/EN 60947-3/UL 60947-3/IS: 13947-3 for isolated Switch
- Compact and modular construction
- AC-23A and AC-33 rating for voltage level up to 690/1000V
- Double quick make/break operation feature that enhance performance
- Provision for add on auxiliary contact for identification of switch position
- Front operated mechanism
- Suitable for vertical, horizontal, upwards, downwards orientation
- Modular switch, can be configured from single pole to 8 pole

ABN Change Over Switches were developed according to IEC 60947-3 / IEC 60946-6-7 and enable the manual drive of motors, machines and other equipment. Besides carrying and interrupting electric currents under normal or over load conditions, the design of the switches provides complete physical insulation between the circuit on the power supply when in the Off position. In this position, it is possible to use 3 pad locks in order to prevent inadvertent actuations, increasing the safety of operators and maintenance personnel.

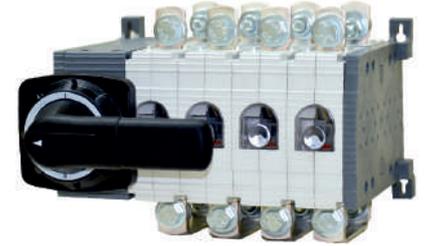

ABN Change Over Switches provide reliable protection for personnel and ensure high system availability in buildings, infrastructure and industrial plants.

## Change Over Switches I-0-II operation, open transition RVCO 20...125 A

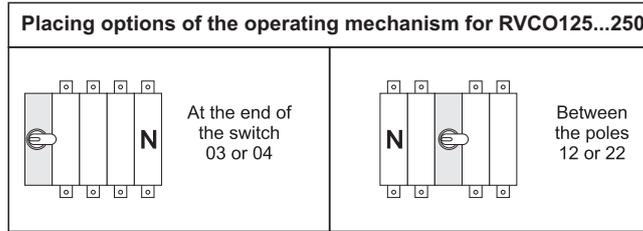

Change Over Switches I-0-II operation, open transition with pistol handle, base mounting, including a black ON-OFF-ON plastic handle and shaft as standard, The handle is IP65 protected, padlockable in the OFF position and with door interlock in the ON position. The shaft can be adjusted to different installation depths.
